

Clinical and Pathology Services

Billings Clinic Laboratory Services provides a full range of Anatomical Pathology and Clinical Laboratory services including:

Surgical Pathology	Clinical Chemistry
Cytopathology	Hematology
Clinical Pathology	Coagulation
Dermatopathology	Medical Microbiology
Hematopathology	Molecular
Consultations in Transfusion Medicine	Andrology
Immunopathology	

Medical Directorships:

Six board-certified pathologists, who qualify to act as medical directors of highly to moderately complex laboratories and meet Clinical Laboratory Improvement Amendments (CLIA) requirements, staff the Billings Clinic Laboratory. Billings Clinic medical directorship involves a close working relationship with the laboratory director, supervisor, and staff members. A pathologist is available 24 hours a day, 365 days a year for:

- Clinical Consultation
- Test Selection
- Proficiency Testing
- Quality Control and Quality Assurance
- Blood Bank and Microbiology Consultation
- Chart Review
- In-House Education
- Pathology Surgical Services

Technical Consultant:

Billings Clinic has a Medical Technologist who is qualified to act as a technical consultant or laboratory director for your laboratory. The Technical Consultant works closely with the director of your laboratory to achieve this task. This service involves helping the laboratory supervisor meet the technical and scientific oversight of the laboratory demanded by CLIA. Our comprehensive program includes:

- CLIA Regulations
- Quality Control
- Quality Assurance
- Proficiency Testing
- Preventative Maintenance
- Complaint Management
- Employee/Interoffice Communications
- Compliance
- Personnel Competency

On site visit arrangements are made depending on the client's wants and needs. Telephone consultation is also available.

If you are interested in the above services, please contact the Billings Clinic Laboratory Services Marketing Team at (406) 657-4060 or (866) 232-2522.
